Introduction to the Company

History

Established in the United Kingdom in 1999 to design and develop innovative storage containers. We had a humble beginning and started with only our founder working in the business. He had no previous experience of the storage market, no retail or design experience but a belief that there was a market for a great storage box with a great value for money proposition. His background was working as an accountant at relatively small manufacturing businesses.

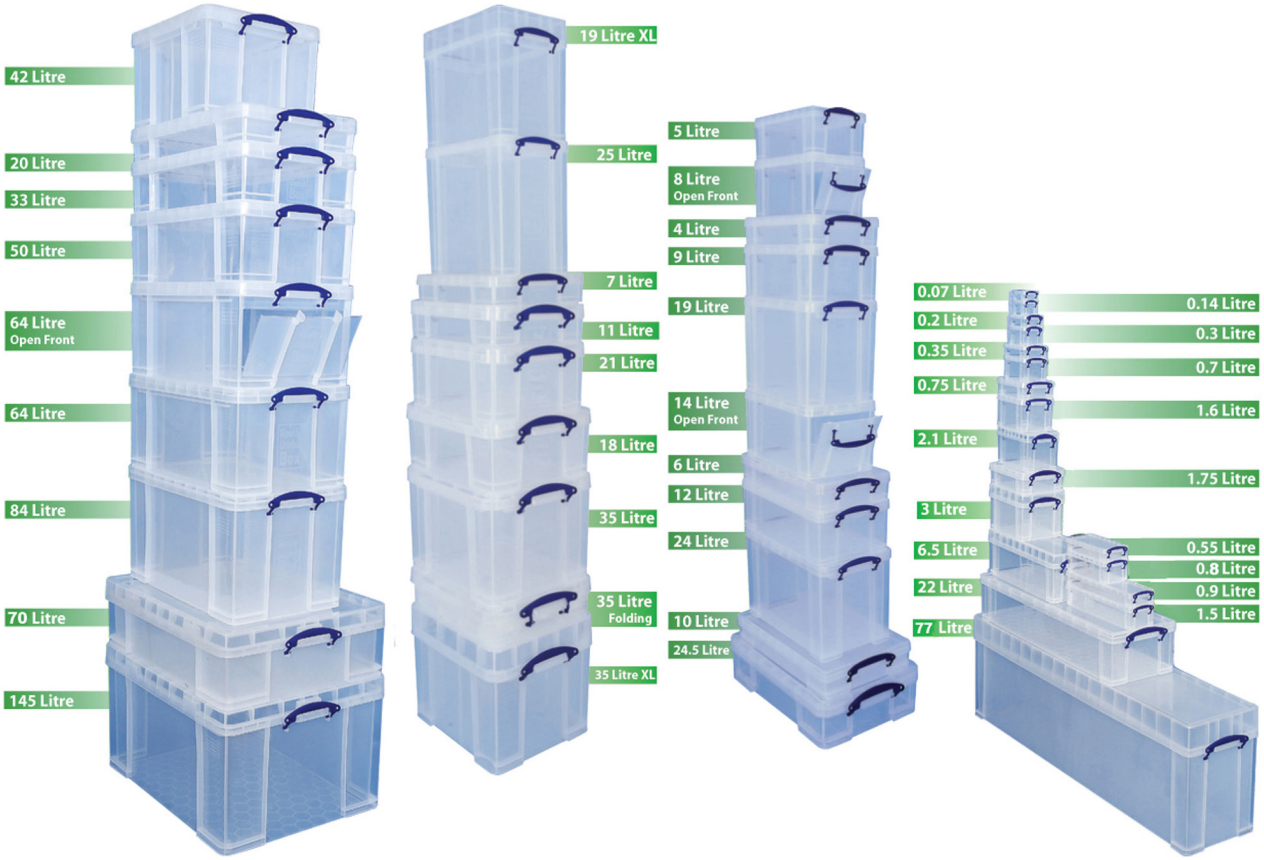
Fast forward to now and we are a fully integrated lean manufacturing business who are embracing technology to create improvements in efficiency. We have expanded our product range from 1 to 8 product categories and embrace the opportunities that Globalism has to offer. We employ 420 people mainly in UK manufacture but have 10 employees in USA.

The Founder's son manages the global logistics and manufacturing plan from his office in Chicago. We have just commenced manufacturing in our second production facility that triples our floor area. This new factory build is part of a four phase project that will maybe take another 4 years to complete.

Mission statement

To manufacture great value innovative plastic based items to be used in both your home office and factory environment.

Really Useful Boxes



0.07 Litre

L90 x W65 x D30

Suggested uses: Stamps,beads,tacks
